NSW-RRTN
NSW RNA RESEARCH & TRAINING NETWORK

Partner with us

The NSW RNA Research & Training Network (NSW-RRTN) is a NSW Government-supported initiative bringing together 12 universities and affiliated medical research institutes across NSW and the ACT to accelerate RNA research, strengthen industry capability, and develop the skilled workforce needed for Australia's growing RNA sector.

Through the NSW-RRTN Postgraduate Training Scholarship Program, industry partners have a unique opportunity to host highly talented PhD candidates undertaking research aligned with the needs of the RNA ecosystem, including therapeutics, vaccines, diagnostics, advanced manufacturing, agriculture, biosecurity, regulation, policy, and translation.

ACCESS WORLD-CLASS RNA TALENT BUILD YOUR FUTURE WORKFORCE SOLVE REAL CHALLENGES

Why Become an Industry Partner?

FREE 3-Month Industry Internship

Every NSW-RRTN scholar completes a three-month paid industry internship, with internship support provided through the program.

This gives organisations access to highly skilled researchers at no direct salary cost to the host organisation.

Benefits to your Organisation

- Access emerging PhD talent trained in cutting-edge RNA science and technology
- Advance strategic projects, technical challenges, feasibility studies, or innovation initiatives
- Build relationships with leading universities and research institutes across NSW and the ACT
- Identify future employees and develop a recruitment pipeline of RNA-skilled graduates
- Contribute to shaping the next generation of Australia's RNA workforce
- Increase exposure to the latest research, technologies, and translational opportunities

Need Innovation Capacity?

Host a NSW-RRTN PhD Intern for 3 Months – at no salary cost to your organisation

NSW-RRTN internships connect organisations across biotech, pharma, manufacturing, health, agriculture, government and technology with outstanding research talent.

Get involved and help shape the future of Australia's RNA ecosystem.
